SmartLink Matter and Shademate App

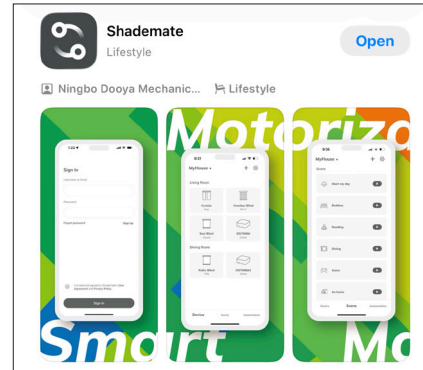

Shademate
-Built on Connector Platform

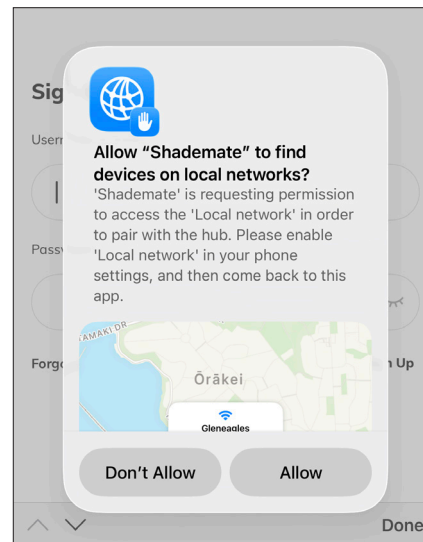

1

Pairing SmartLink Matter and Adding Devices

Search for and download the Shademate App in the Appstore / Google Play Store

Allow Shademate to access local devices as this will speed up locating the SmartLink Matter

2

Enter your email address and a password and select Sign Up. You will be asked to select your Region

Sign Up

Region Americas, Oceania >

Autumn_Windoware

Username shall begin with a letter and can be between 6 to 63 characters long, containing letters (a-z, A-Z), numbers (0-9), periods (.), underscore(_), and dash (-).

Confirm password

Password must be at least 8 characters.

Done

Record Backup Code

Backup code

Please save the backup code below to complete the sign up process.

What is the backup code?

If you forget your password, you can only reset it with the backup code. Please keep these backup codes in a safe, but accessible place.

Send to E-mail Done

You can opt to bind your account to an email address or skip this stage

Binding an Email

Would you like to bind your account 'Autumn_Windoware' to an email address now?

Binding an email allow you log in with either your username or your email. Please note that once bound, the email cannot be changed.

You can skip this step and log in with your username only. You'll be able to bind an email later in the settings.

Bind Now Skip

3

If you bind your email address, you will receive a verification code in your email to confirm you are the user

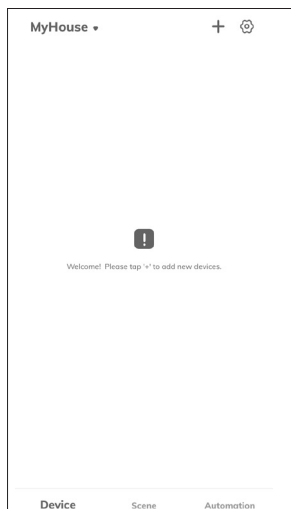

Enter Verification Code

Just check to make sure you're really you. We've sent a verification code to **Autumn@aol.com.nz** (remember to check your Spam)

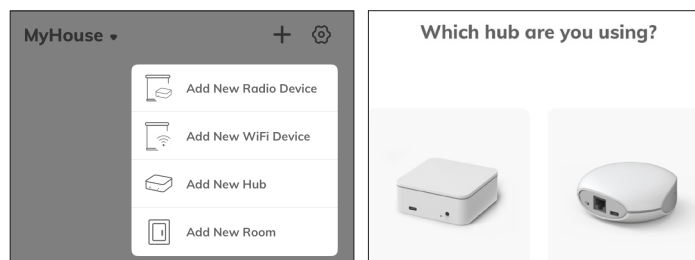

Please enter the verification code to continue setting up your account.

Didn't receive verification code, [Resend](#)

Once you are logged in you will land on the homepage

Select the '+' button in the top right corner to add a Device. Select Add New Hub first

4

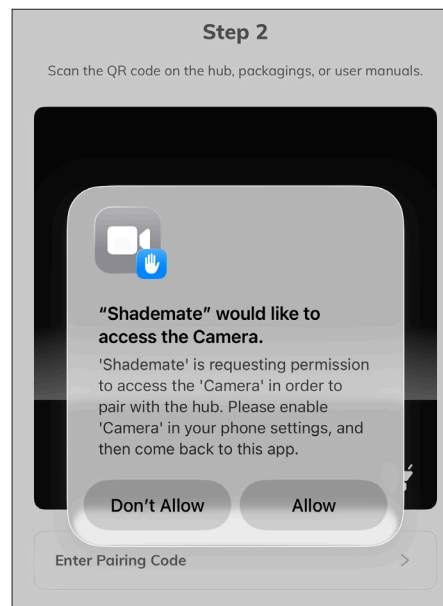

STEP 1

The app will provide next steps for activating the SmartLink Matter

STEP 2

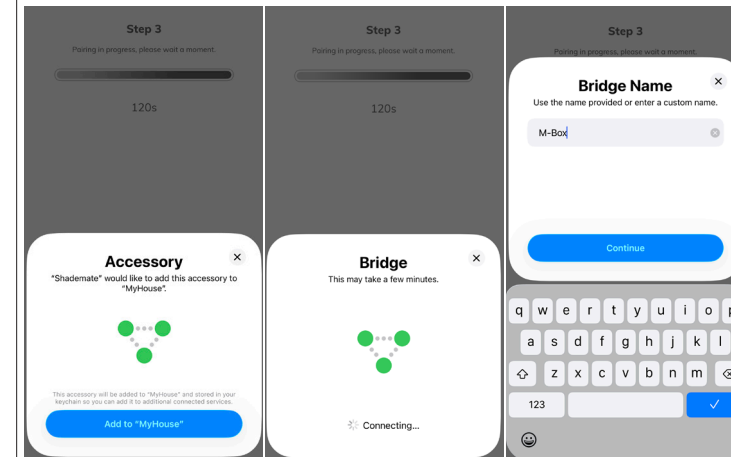

The SmartLink Matter has a QR code on the base which your phone will ask to scan via your camera app, allow access to utilise the QR code

5

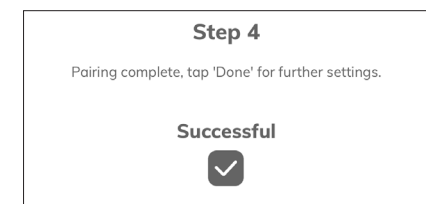

STEP 3

The SmartLink Matter will request to link to your account My House, allow access via Add to My House and the Bridge will connect; there will be a 120s countdown. Once connected, you will be required to name the Bridge and Continue

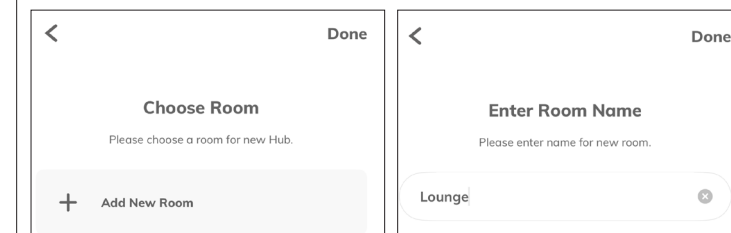

STEP 4

The Bridge is paired and the app will show this has been successful. Select Done to move on

STEP 5

The Bridge / Hub will need to be added to a Room. Select Add New Room and name the room as you like

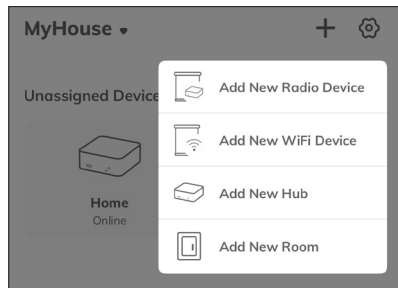

6

You will now be back on your home screen and can add additional Rooms or Devices. Select the '+' button in the top right corner and select Add New Radio Device to connect:

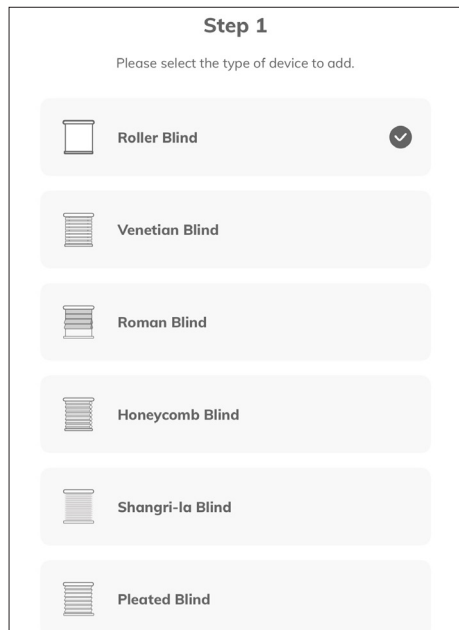

- Battery Operated Roller
- Battery Operated Honeycomb
- Battery Operated Mikronwood Venetian
- Battery Operated Roman Blind
- Hardwired or Battery Operated Curtain Track

Select Add New Wifi Device to connect:
Hardwired Remote Roller

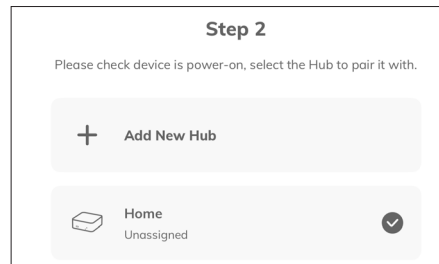

The app will guide you through the steps

STEP 1 is to select the type of product you are adding e.g. Roller Blind, Venetian Blind

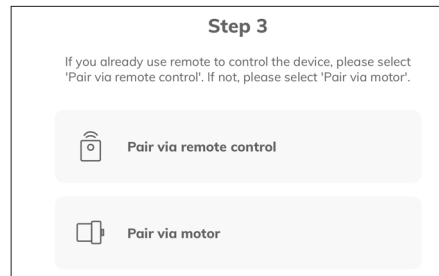

7

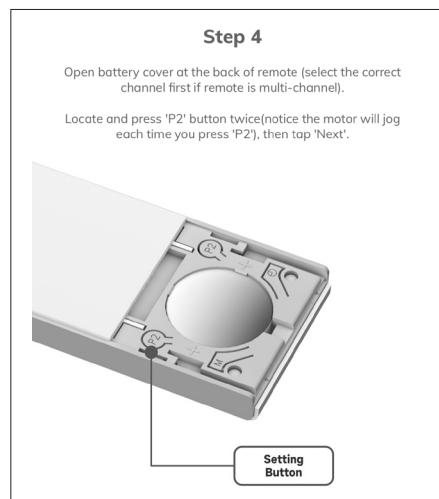

STEP 2 is to add the Device to the Hub, this should already be checked in the tick box

STEP 3 is to pair the Device and you can choose via Remote Control or via Motor. Pairing via the Remote is simpler if you do not have quick and easy access to the Motor end. Select the method you wish to use to pair your Device to the app

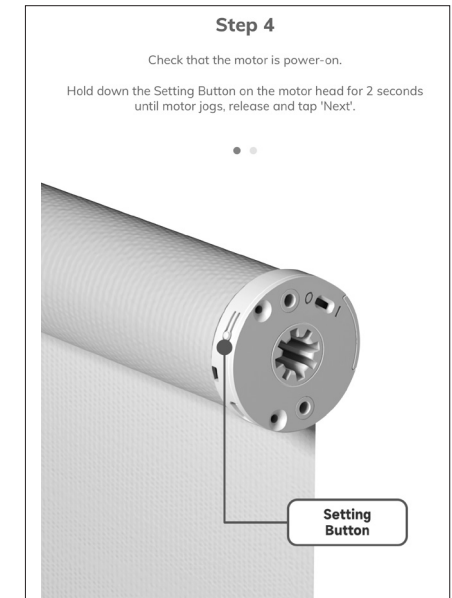

STEP 4 connecting via Remote will require you to access the back side of the Remote. You will need to remove the back cover from the Remote

8

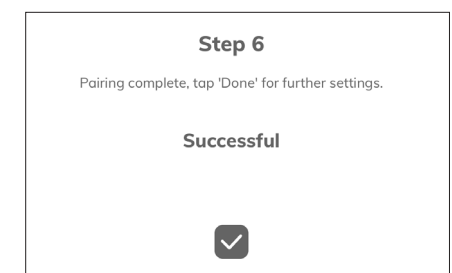

STEP 4 connecting via Motor will require you to access the end of the Motor head

STEP 5 shows a 30s countdown while the Device is pairing

STEP 6 will confirm that the Device has been paired

9

The Device will require a name, call the Device whatever you like i.e. Room or Window Name, Number. Be advised that this is the name you will need to recall if you are controlling your blinds via Voice Activation with Alexa, Google, Apple, Samsung i.e. 'Alexa, Open Lounge Blind'. Try not to make the name of the Device too complicated

Enter Device Name

Please enter name for new device.

1

Choose the Room that your Device will be saved into. You can create a new room at this point or select an existing room

Choose Room

Please choose a room for device.

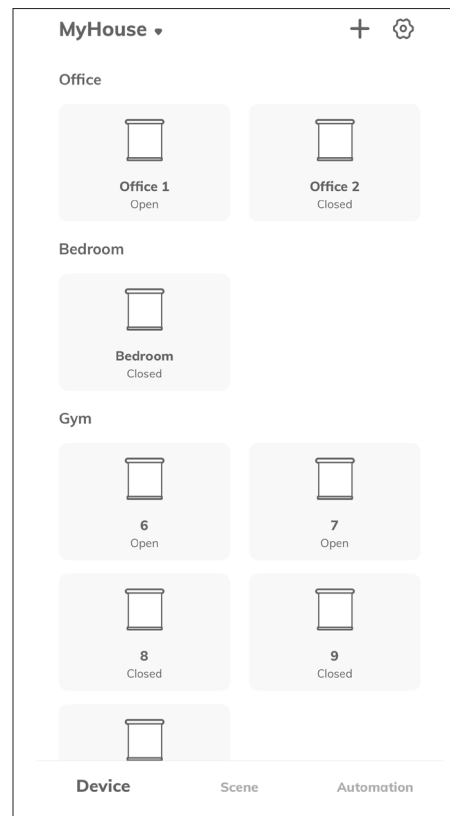

+

Add New Room

Lounge

10

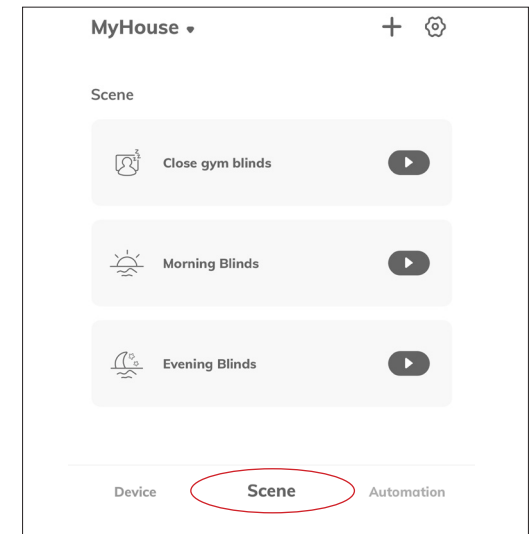

You will return to the home screen and can continue to repeat the process of adding Rooms and Devices until you have your Shademade app and all Devices configured to your requirement

11

Setting up a Scene

In order to set up a Scene whereby multiple Devices operate at a certain time or via a certain command e.g. via Alexa voice control, Select the Scene tab at the bottom of your home screen

Enter a name for your Scene

<

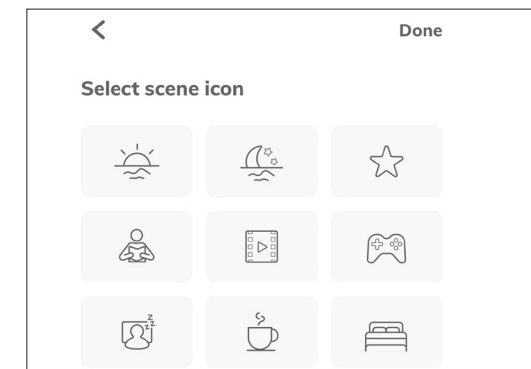

Done

Enter Scene Name

Scene name

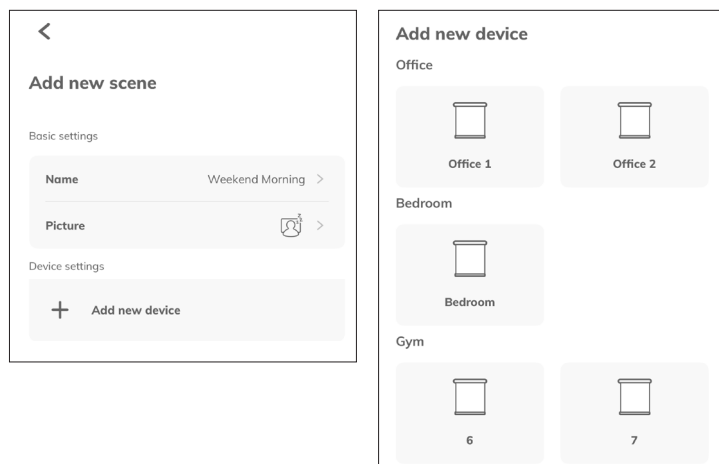

Morning

Select a Scene icon if you wish

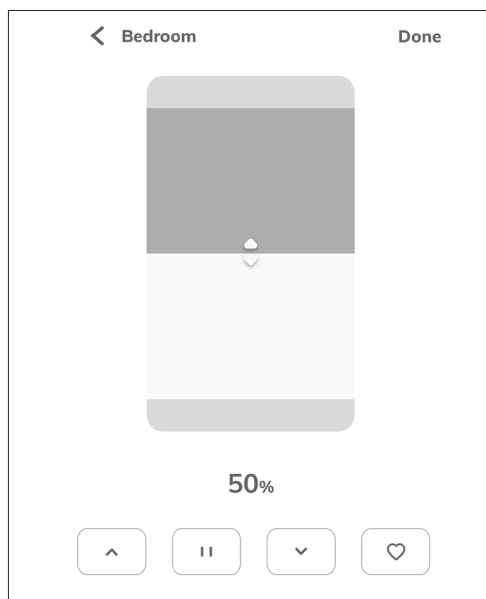

12

Select Add new Device to customise the scene. The available Devices will appear

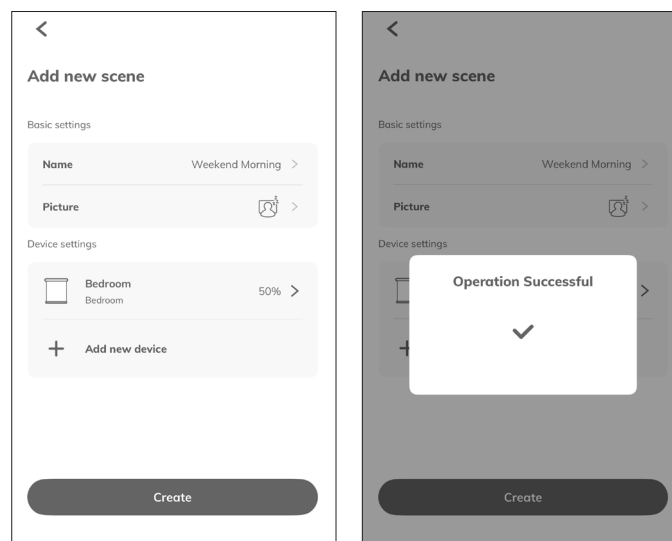

Once the relevant Device has been selected, position the arrows up or down reflecting opening or closing the blind. The example below shows the blind will be positioned to 50% when this Scene is activated. Select Done when the the percentage is correct

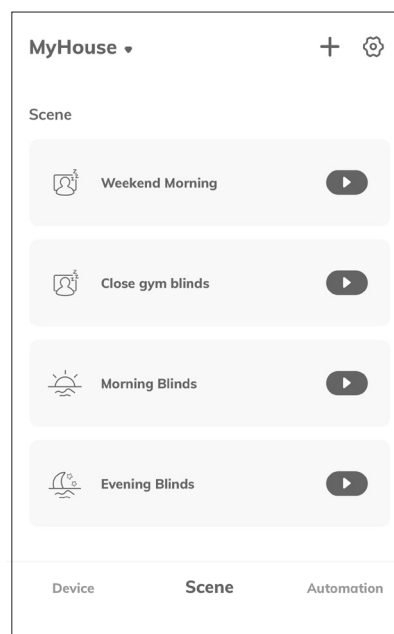

13

Continue to add as many Devices to the Scene as required. Select Create when the Scene is complete. The app will show that the scene has been saved successfully

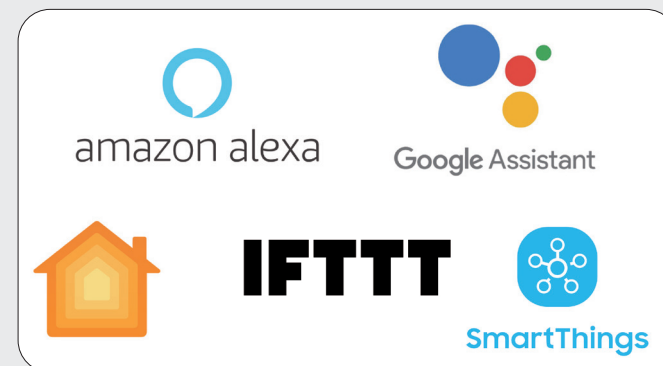

All created and available Scenes will be visible in the app. To operate the Scene, select the arrow icon next to the Scene name

Compatible with...

Shademate App (which requires a **SmartLink Matter** hub on a 2.4 GHz network) is compatible with the following applications:

Amazon Alexa & Google Assistant – provide ultimate voice control for managing smart-home devices.

Apple Home – with Apple's built-in system you can control smart-home devices from your iPhone, iPad, Apple Watch, or via Siri.

IFTTT is shorthand for 'If This Then That'; it is an automation tool for connecting apps and services. IFTTT works with more than 650 services and brands, including apps such as weather stations, so blinds can be controlled based on the outside temperature and the sun's position, for example, sunrise and sunset.

SmartThings – with SmartThings, your home becomes a connected space that makes your life simpler. You can connect and control multiple devices quickly and easily, no matter where you are.
